

#'tagging lives

HackGTBIT- hackathon

Goal

- The goal will be to create usable software or hardware hence creating a functioning product by the end of the event.
- Teams will be presenting their ideas and ideas worth spreading will be short listed
- It will tend to have a specific focus, which includes the programming language used
- An application or a website will be the final aim of the participating teams.
- To give all the participants a clear idea of hackathon

Requirements

- College Auditorium and 1 Floor Lab block
- Projector
- Funds
- Certificates for all the volunteers and collage LOA

Judgment Criteria

- Celerity in Idea
- Presentation
- Implementation

What is different?

- Only for students of GTBIT
- Teams of 4 students to be made and registered beforehand
- Each team from 4th year must have a 1st year student as a member.
(Hence making it 3 4th year students and 1 first year student as a team)

Special prizes for the first year teams for their dedication and idea.
